MOVE MEN AND MATERIALS IN MINUTES!

The **Browser™** meets material handling needs in a new way. It moves key people and material quickly throughout large areas and between buildings. It takes material handling and maneuverability to a new level in a small package.

The **Browser** is economical and versatile. With its various option packages, it is ideal for moving personnel, packaging, tools, parts, mail and more.

The **Browser** runs 5 continuous hours on a charge and can cover 20 miles. It charges fully over a single shift or, with its optional 1 Hour Quick Charger, can be ready to go again quickly. A 24 volt XTI™ Hub Motor™, a new technology motor housed in the front wheel, drives the Browser. It is powerful enough to carry a 300-pound rider.

You can use the optional trailer hitch to tow a trailer with 400 pounds of cargo.

Numerous basket options make the Browser ideal for carrying mail, boxes, tools or parts. It even has three desktop options including a laptop-mounting platform for securing a PC at your fingertips.

The Browser moves and manages material. It beats walking!

THE BROWSER IS A COMPLETE SYSTEM WITH MULTIPLE OPTIONS AVAILABLE!

ACCESSORIES ALLOW YOU TO CUSTOM DESIGN YOUR OWN COMPLETE BROWSER SYSTEM!

ACCESSORIES FOR HANDLING MATERIALS AS WELL AS PERSONNEL!
